PROFESSIONAL SUMMARY

Results-driven Backend Developer with 2+ years of experience building scalable REST APIs, microservices, and cloud-based applications. Proven track record of optimizing database performance, leading development teams, and delivering production-ready MVPs. Strong expertise in Python/Django, Node.js/NestJS, PostgreSQL, and cloud infrastructure (AWS, Docker). Passionate about writing clean, maintainable code with comprehensive test coverage.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL, C
- **Backend Frameworks:** Django, Django REST Framework, FastAPI, NestJS, Flask, Express.js
- **Frontend:** Next.js, React.js
- **Databases:** PostgreSQL, MySQL, Redis, Firebase
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Render, Vercel, CI/CD
- **Tools & Technologies:** WebSockets, RabbitMQ/Kafka, Postman, Swagger/OpenAPI, Prisma ORM
- **Testing:** Pytest, Jest, Unit Testing, Integration Testing
- **Version Control:** Git, GitHub, Code Review
- **Methodologies:** Agile/Scrum, RESTful API Design, Microservices Architecture, TDD

PROFESSIONAL EXPERIENCE

Backend Developer Team Lead

Agrovest | January 2025 - Present | Nigeria

- Led a team of 4 developers in building scalable REST APIs for an agricultural e-commerce platform serving 500+ users
- Designed and implemented PostgreSQL database architecture, optimizing query performance by 45% through indexing and query refactoring
- Deployed and maintained production APIs on Render with 99.8% uptime, integrating AWS S3 for media storage
- Collaborated with frontend team using Agile methodology to deliver mobile app integration with real-time data synchronization
- Delivered MVP 2 weeks ahead of schedule with comprehensive API documentation using Swagger/OpenAPI

- Implemented JWT-based authentication and authorization, ensuring secure user data management
- Conducted code reviews and mentored junior developers on best practices for API design and database optimization

Backend Developer

Manifesti | January 2025 - Present | Remote

- Developed 20+ modular and scalable REST API endpoints using NestJS and TypeScript for mobile applications
- Implemented complex database schemas with Prisma ORM, reducing data retrieval time by 35%
- Integrated AI services for user goal tracking features, handling 1000+ daily requests
- Ensured 90%+ test coverage using Jest for unit and integration testing
- Applied security best practices including input validation, rate limiting, and OWASP guidelines
- Documented all API endpoints with detailed Swagger specifications for frontend integration

Full Stack Developer & Backend Lead

Q Circle Hackathon | 2025 | Remote

- Architected and developed RESTful APIs integrated with Next.js frontend, completing project in 48-hour sprint
- Maintained PostgreSQL database integrity with proper indexing and transaction management
- Implemented CI/CD pipeline for rapid deployment on Vercel/Render with automated testing
- Collaborated with cross-functional team using Git for version control and code review

Backend Developer

Faculty of Computing, University of Uyo | 2023 - 2025 | Uyo, Nigeria

- Collaborated with team of 5 backend engineers to create APIs for Planora event management system serving 200+ users
- Developed RESTful services using Python/Flask and SQL with comprehensive error handling
- Implemented Git workflow with feature branches and pull requests for team collaboration
- Participated in Agile sprints with daily standups and bi-weekly retrospectives

KEY PROJECTS

Mafia Voteout Game

Real-time multiplayer game supporting 50+ concurrent users using Django Channels (WebSockets) and Redis for session management. Integrated AI for game logic and player interactions. Technologies: Django, WebSockets, Redis, PostgreSQL.

Agrovest E-Commerce Platform

Full-stack agricultural products marketplace with payment integration, inventory management, and admin dashboard. Implemented caching with Redis, reducing page load time by 40%. Technologies: Next.js, Django REST Framework, PostgreSQL, AWS S3.

Upstart Multi-Vendor Platform

Multi-vendor e-commerce platform with real-time notifications using WebSockets. Built microservices architecture with RabbitMQ for asynchronous processing. Technologies: Next.js, Django REST Framework, PostgreSQL, WebSockets, Docker.

EDUCATION

Bachelor of Science in Computer Science (In Progress)

University of Uyo, Nigeria | Expected Graduation: 2027
